6	[assent]	<p>BROWN UNIVERSITY ASSENT FOR RESEARCH PARTICIPATION</p> <p>Child under 18 years' old Study Title: Prenatal Pathways to Adolescent Health and Behavior (Version 4, November 6, 2020)</p> <p>You are invited to take part in a Brown University research study. Your participation is voluntary.</p> <ul style="list-style-type: none"> • RESEARCHER: This research is being conducted by Lauren Micalizzi, Ph.D. She may be contacted at 401-863-6640 or lauren_micalizzi@brown.edu. • PURPOSE: This project is a follow-up to a study that your mother completed when you were a baby. You are being asked to be in this study because we want to learn about how your experiences growing up made you who you are today. Just because your mother took part in the original study, that does not mean that you have to be part of this study. • PROCEDURES: You will be asked to visit Brown University three times (today, and 6 and 12 months from today). You will be asked to: (1) play computer games; and (2) answer questions about yourself and your home. We will ask about your feelings, changes to your body, eating habits, what it is like living in your home, your friends and how they act, problems that you may have, and how you think about information. We will also take measurements of your body and growth. You will be asked to play computer games and you will be wearing a heart monitor, which includes one sticker on your body and a belt that tell us about your heart and breathing. • TIME INVOLVED: The study will take 2 hours of your time on 3 visits to Brown University. In total, this study will take 6 hours of your time. • COMPENSATION: You will be paid \$50 for the first visit and you will be paid \$50 two more times when you come back to finish the study. In total, you can receive up to \$150 for your time. You will be paid in gift cards after each visit. You will be paid in gift cards after each appointment in person or by email. If you don't have an email, your gift card can be emailed to your parent. • RISKS: You may feel uncomfortable answering questions about your life at home. We are going to ask you a lot of questions about yourself and what it is like to live in your house. People answer these questions in a lot of different ways. There is no right or wrong way to answer these questions. How you answer these questions does not mean there is anything good or bad about you. You can choose not to answer questions and you can still be part of this study. You can stop being in this study at any time. <p>You may get bored playing the computer games. You can take a break between games if you want to.</p> <p>There is a chance of loss of privacy. We will be very careful to protect the information that you give us.</p> <p>You will be asked to wear a heart rate monitor, which includes one sticker on your skin and a belt. You may find the heart monitor uncomfortable to wear and it may cause skin irritation. We will do everything we can to make sure it is comfortable for you. If it is not, we can remove it.</p> <ul style="list-style-type: none"> • BENEFITS: You may not directly benefit from being in this research study. 	<p>radio, Required</p> <table border="1" style="margin-bottom: 10px;"> <tr><td style="padding: 2px;">1</td><td style="padding: 2px;">Yes, I would like to participate and have read the information in this document.</td></tr> <tr><td style="padding: 2px;">0</td><td style="padding: 2px;">No, I do not want to participate.</td></tr> </table> <p>Custom alignment: LV</p>	1	Yes, I would like to participate and have read the information in this document.	0	No, I do not want to participate.
1	Yes, I would like to participate and have read the information in this document.						
0	No, I do not want to participate.						

	<ul style="list-style-type: none"> • CONFIDENTIALITY: All of the information that you give us will be treated as private information. All of your information will have a number on it, not your name. <p>There are times when the law might require Brown University to give your information without your permission. To give you some examples, if you are in danger, if you are not being taken care of, or if where you live is not safe or healthy for you, the Law requires that we report that information to the Department of Children, Youth and Families (DCYF). DCYF works with families and communities to keep children safe and healthy. If you tell us something that makes us think that you might hurt yourself or someone else, we will need to share that information with a doctor.</p> <p>Brown University staff sometimes review studies like this one to make sure they are being done safely and correctly. If a review of this study takes place, your records may be examined. The reviewers will protect your privacy.</p> <ul style="list-style-type: none"> • VOLUNTARY: You do not have to be in this study if you do not want to be. Even if you decide to be in this study, you can change your mind and stop at any time. • CONTACT INFORMATION: If you have any questions about your participation in this study, you can call Dr. Micalizzi at 401-863-6640 or email her at lauren_micalizzi@brown.edu • YOUR RIGHTS: If you have questions about your rights as a research participant, you can contact Brown University's Human Research Protection Program at 401-863-3050 or email them at IRB@Brown.edu. • CONSENT TO PARTICIPATE: Clicking the box below confirms that you have read and understood the information in this document and that you agree to volunteer as a research participant for this study.

15	<p>[assentdna1]</p> <p>BROWN UNIVERSITY ASSENT ADDENDUM FOR RESEARCH PARTICIPATION</p> <p>Child under 18 years' old Study Title: Prenatal Pathways to Adolescent Health and Behavior Version 1, June 28, 2021</p> <p>You are already enrolled in this research study. You reviewed and signed the original study consent document (Assent Version 5, date: 6/28/21). You are now being invited to take part in new study procedures that require your additional consent.</p> <ul style="list-style-type: none"> ● RESEARCHER: You can reach the person conducting this study, Lauren Micalizzi, Ph.D. at 401-863-6640 or lauren_micalizzi@brown.edu. ● NEW PROCEDURES: You are being asked to give a spit sample which can be used to study your genes. We will rub the inside of your mouth with cotton swabs (like Q-tips) and you will be asked to spit into a tube. This will happen at all three visits because research has shown us that your genes can change over time. We are asking to do this because we want to look at the age of your genes and how the other information that we ask you about in this study (for example, your health, behaviors, home environment) relate to your genes. We may study your spit in different ways, for example we may study all of your genes or we may study specific information based on research others have done. We will not share the genetic results with you or your parent(s) and your genetic material will not be shared outside of Brown University. We may continue to study your genetic information in different ways, but this will not include more testing. ● TIME INVOLVED: This will take about 5 minutes of your time at this appointment and again at the appointments 6 and 12 months from now. ● COMPENSATION: You will receive \$10 each time we collect your saliva. With the addition of this new compensation, the total compensation you will receive for the entire study is \$180. ● RISKS: If you agree to saliva collection and genetic testing, there are some additional risks, including: <ul style="list-style-type: none"> a) discomfort: you may experience some mild discomfort with swabbing their cheek and spitting into the tube; b) confidentiality/the inability to de-identify genetic material: genetic material is by nature identifiable; c) results: the results of the genetic test carry information about you; and d) when you provide genetic material, you are also providing information about genetic relatives. <ul style="list-style-type: none"> o If you experience discomfort with the saliva collection, we can take a break or stop at any time. As with all other records obtained in this study, we will treat genetic information as private data; information will be coded with a unique number and your name will not be included on the saliva tube or genetic results. Data will be stored on a secure computer server and will not be shared. o Your results are protected by a federal law, called the Genetic Information Nondiscrimination Act (GINA), generally makes it illegal for health insurance companies, group health plans, and most employers to discriminate 	<p>radio, Required</p> <table border="1" style="margin-bottom: 10px;"> <tr> <td style="padding: 2px;">1</td> <td style="padding: 2px;">Yes, I would like to participate and read the information in this document.</td> </tr> <tr> <td style="padding: 2px;">0</td> <td style="padding: 2px;">No, I do not want to participate.</td> </tr> </table> <p>Custom alignment: LV</p>	1	Yes, I would like to participate and read the information in this document.	0	No, I do not want to participate.
1	Yes, I would like to participate and read the information in this document.					
0	No, I do not want to participate.					

		<p>against you based on your genetic information. This law will protect you in the following ways:</p> <ul style="list-style-type: none"> ▪ Health insurance companies and group health plans may not request the genetic information that we get from this research. ▪ Health insurance companies and group health plans may not use genetic information that we get from this research when making decisions regarding their eligibility or premiums. ▪ Employers with 15 or more employees may not use the genetic information that we get from this research when making a decision to hire, promote, or fire your child or when setting the terms of their employment. <p>Be aware that this federal law does not protect against genetic discrimination by companies that sell life insurance, disability insurance, or long-term care insurance, nor does it protect against genetic discrimination by all employers.</p> <ul style="list-style-type: none"> ● BENEFITS: You may not directly benefit from completing this part of the study. ● CONFIDENTIALITY: We will continue to follow the same measures to protect you as were described in the document you signed for the original study. <p>We will treat genetic information as private data; information will be coded with a unique number and the name will not be included on the saliva tube or genetic results. Data will be stored on a secure computer server and will not be shared. Saliva will be stored in a secure location at Brown University. We will destroy your saliva sample after it has been studied or in 10 years if it has not yet been studied. We may contact you to ask to store the saliva longer at that time.</p> <ul style="list-style-type: none"> ● VOLUNTARY: Taking part in these procedures is optional. You do not have to complete the activities if you do not want and you can stop at any time. Deciding not to take part will not affect your participation in the original study. We will contact you when you are 18 years old to ask if it is okay to continue to store/use your genetic information. ● CONTACT INFORMATION: If you have any questions about your participation in this study, you can call Dr. Micalizzi at 401-863-6640 or lauren_micalizzi@brown.edu. ● YOUR RIGHTS: If you have questions about your rights as a research participant, you can contact Brown University's Human Research Protection Program at 401-863-3050 or email them at IRB@brown.edu. ● CONSENT TO PARTICIPATE: <p>Your signature below shows that you have read and understood the information in this document, and that you agree to be a research participant for the saliva procedures.</p>

You reviewed and signed the original study consent document (Assent Version [5, date: 6/28/21]). You are now being invited to take part in new study procedures that require your additional consent.</p> <ul style="list-style-type: none"> ● RESEARCHER: You can reach the person conducting this study, Lauren Micalizzi, Ph.D. at 401-863-6640 or lauren_micalizzi@brown.edu. ● NEW PROCEDURES: You are being asked to give a spit sample which can be used to study your genes. We will rub the inside of your mouth with cotton swabs (like Q-tips) and you will be asked to spit into a tube. This will happen at all three visits because research has shown us that your genes can change over time. We are asking to do this because we want to look at the age of your genes and how the other information that we ask you about in this study (for example, your health, behaviors, home environment) relate to your genes. We may study your spit in different ways, for example we may study all of your genes or we may study specific information based on research others have done. We will not share the genetic results with you or your parent(s) and your genetic material will not be shared outside of Brown University. We may continue to study your genetic information in different ways, but this will not include more testing. ● TIME INVOLVED: This will take about 5 minutes of your time at this appointment and again at the appointments 6 and 12 months from now. ● COMPENSATION: You will receive \$10 each time we collect your saliva. With the addition of this new compensation, the total compensation you will receive for the entire study is \$180. ● RISKS: If you agree to saliva collection and genetic testing, there are some additional risks, including: <ul style="list-style-type: none"> a) discomfort: you may experience some mild discomfort with swabbing their cheek and spitting into the tube; b) confidentiality/the inability to de-identify genetic material: genetic material is by nature identifiable; c) results: the results of the genetic test carry information about you; and d) when you provide genetic material, you are also providing information about genetic relatives. <p>o If you experience discomfort with the saliva collection, we can take a break or stop at any time. As with all other records obtained in this study, we will treat genetic information as private data; information will be coded with a unique number and your name will not be included on the saliva tube or genetic results. Data will be stored on a secure computer server and will not be shared.</p> <p>o Your results are protected by a federal law, called the Genetic Information Nondiscrimination Act (GINA), generally makes it illegal for health insurance companies, group health plans, and most employers to discriminate</p>	<p>radio, Required</p> <table border="1" style="width: 100%;"> <tr> <td style="width: 5%;">1</td> <td>Yes, I would like to participate and have read the information in this document.</td> </tr> <tr> <td>0</td> <td>No, I do not want to participate.</td> </tr> </table> <p>Custom alignment: LV</p>	1	Yes, I would like to participate and have read the information in this document.	0	No, I do not want to participate.
1	Yes, I would like to participate and have read the information in this document.					
0	No, I do not want to participate.					

		<p>against you based on your genetic information. This law will protect you in the following ways:</p> <ul style="list-style-type: none"> ▪ Health insurance companies and group health plans may not request the genetic information that we get from this research. ▪ Health insurance companies and group health plans may not use genetic information that we get from this research when making decisions regarding their eligibility or premiums. ▪ Employers with 15 or more employees may not use the genetic information that we get from this research when making a decision to hire, promote, or fire your child or when setting the terms of their employment. <p>Be aware that this federal law does not protect against genetic discrimination by companies that sell life insurance, disability insurance, or long-term care insurance, nor does it protect against genetic discrimination by all employers.</p> <ul style="list-style-type: none"> ● BENEFITS: You may not directly benefit from completing this part of the study. ● CONFIDENTIALITY: We will continue to follow the same measures to protect you as were described in the document you signed for the original study. <p>We will treat genetic information as private data; information will be coded with a unique number and the name will not be included on the saliva tube or genetic results. Data will be stored on a secure computer server and will not be shared. Saliva will be stored in a secure location at Brown University. We will destroy your saliva sample after it has been studied or in 10 years if it has not yet been studied. We may contact you to ask to store the saliva longer at that time.</p> <ul style="list-style-type: none"> ● VOLUNTARY: Taking part in these procedures is optional. You do not have to complete the activities if you do not want and you can stop at any time. Deciding not to take part will not affect your participation in the original study. We will contact you when you are 18 years old to ask if it is okay to continue to store/use your genetic information. ● CONTACT INFORMATION: If you have any questions about your participation in this study, you can call Dr. Micalizzi at 401-863-6640 or lauren_micalizzi@brown.edu. ● YOUR RIGHTS: If you have questions about your rights as a research participant, you can contact Brown University's Human Research Protection Program at 401-863-3050 or email them at IRB@brown.edu. ● CONSENT TO PARTICIPATE: <p>Your signature below shows that you have read and understood the information in this document, and that you agree to be a research participant for the saliva procedures.</p>

Instrument: Substance use: alcohol (substance_use_alcohol)  Enabled as survey

	169	[alc_inst]	The next several questions are about your use and experiences with alcohol. When answering these questions, please do not include alcoholic drinks you had as part of a religious ceremony such as in church or at a Seder dinner. Please do include any other experiences you have had with drinking alcohol, including drinks you may have had with your parents. Remember, we will not share your answers with anyone. For this next set of questions, please answer for the FIRST time you ever had a sip of alcohol. We are interested in your very first sip, even if it wasn't a full drink of alcohol. You may remember having a sip, or you may have found out from somebody else. Please respond as well as you can remember.	descriptive				
	170	[alc1]	How many total times have you had a sip of alcohol	text (integer, Min: 0, Max: 1000)

Instrument: Early Adolescent Temperament Questionnaire (early_adolescent_temperament_questionnaire) 														
	350	[eatq_instructions]	Below will find a series of statements that people might use to describe themselves. The statements refer to a wide number of activities and attitudes. For each statement, please pick the answer that best describes how true each statement is for you. There are no best answers. People are very different in how they feel about these statements. Please pick the first answer that comes to you.	descriptive

553	[pconsent]	<p>BROWN UNIVERSITY CONSENT FOR RESEARCH PARTICIPATION</p> <p>Parent Consent Study Title: Prenatal Pathways to Adolescent Health and Behavior (Version 4, November 6, 2020)</p> <p>KEY INFORMATION: You are invited to take part in a Brown University research study. Your participation is voluntary.</p> <ul style="list-style-type: none"> • PURPOSE: This project is a follow-up of the Baby's Breath study that you completed when you were pregnant with the child who is also being asked to participate in this study. We want to learn more about your health and behavior since the completion of the original study. Just because you participated in the original study, that does not mean that you have to be part of this study. • PROCEDURES: You will be asked to attend three visits to Brown University (today, and approximately 6 and 12 months from today) and will complete: (1) computer games; and (2) questionnaires about yourself and your child. We will ask about your stress, what it is like living in your home now and when your child was younger, your substance use and problems that you may have, and how quickly and accurately you think about information. You will be asked to play computer games and you will be wearing a heart monitor and respiration belt as you play. • TIME INVOLVED: The study will take approximately 2 hours on your first visit and 1.5 hours of your time on 2 future visits to Brown University. In total, this study will take 5 hours of your time. • COMPENSATION: You will receive \$50 for the first visit and you will receive \$25 for each follow-up visit. In total, you can receive up to \$100. You will be paid in gift cards after each visit. We will email you the gift card or give it to you in person. Compensation for travel expenses (e.g., parking costs, bus or cab fares) will also be provided. • RISKS: You may feel uncomfortable about the sensitive topics discussed, and you may experience boredom while completing computer games. There is a chance of loss of privacy and confidentiality. We take these risks seriously and explain the risks and how they are minimized in sections 4 and 5 below. • BENEFITS: There are no direct benefits to participants in this study. <p>1. Researcher(s): This research is being conducted by Lauren Micalizzi, Ph.D. She may be contacted at lauren_micalizzi@brown.edu.</p> <p>2. What is this study about? The purpose of the study to learn more about your health and behavior since the completion of the original study. We want to learn about what it is like living in your home now and when your child was younger, your substance use and other problems that you may have, and how quickly and accurately you think about information. You are being asked to participate in this study because: (1) you and your child participated in the Baby's Breath study when you were pregnant with your child; (2) your child is now approximately 10-13 years of age; (3) you speak and understand English. Your participation in this study starts today and will end when you complete your third visit to Brown University approximately 12 months from today.</p>	descriptive

3. What will I be asked to do?
Today you will be asked to complete computer games and questionnaires about how quickly and accurately you think about information, your behavior, your health, and aspects of your home and family now and when your child was younger. You may refuse to answer or skip any questions asked of you. You and your child will complete the study in separate rooms.

The study will take approximately 2 hours on your first visit and 1.5 hours of your time on 2 future visits to Brown University. In total, this study will take approximately 5 hours of your time.

4. Will I be paid?
You will receive \$50 today and you will receive \$25 when you return in 6 and 12 months. If you complete all three of these visits, you will receive \$100 in total. You will be paid in gift cards after each visit.

5. What are the risks?
We are going to ask you a lot of questions about your child and what it is like living in your house. Some of the questions we ask in the interview may make you uncomfortable, or bring up unpleasant feelings or memories. People answer these questions in a lot of different ways. There is no right or wrong way to answer these questions. How you answer these questions does not mean there is anything good or bad about you. The questionnaires that you will answer are commonly used in research and clinical practice. You may choose not to answer any questions and you may stop your participation in the study at any time. You may also request to speak with Dr. Spirito, a licensed clinical psychologist that is involved in this study at any time if you become upset or experience emotional discomfort. You will be asked sensitive information about a number of behaviors including alcohol and drug use and other problem behaviors.

There is a risk of loss of privacy or confidentiality of these data. We take this risk very seriously, and we will take steps to protect your and your child's information. We describe the steps we will take in Section 7 "How will my information be protected" below.

The heart monitor consists of one wired electrode that will be attached to your skin and you will be asked to wear a respiration belt. You may experience some discomfort from the heart monitor and respiration belt and it may cause skin irritation. We will do everything we can to make sure these are comfortable for you. If it is not, we can remove it.

6. What are the benefits?
You may not directly benefit from being in this research study.

7. How will my information be protected?
All of your records from this study will be treated as private records. Your name will not be on the questionnaires. All information will be identified only by a code number, not your name. All data will be stored on a secure server or a password protected, encrypted external hard drive stored in a locked cabinet.

Only researchers working on this study will have access to the information you provide. There are times when other researchers may ask to see the responses of participants in the study. If this occurs, we will not release your name or any other information that could identify you.

		<p>There are times when the law might require Brown University to release you or your child's information without either of your permission. To give you some examples, if you disclose information that makes us suspect abuse or neglect of your children, or if your child reports any information that makes us suspect that she or he has been the victim of abuse or neglect, State Law requires that we report that information to the Department of Children, Youth and Families (DCYF). If you or your child disclose information that makes us concerned that you or your child are a harm to yourself/theirselfes or others, we will be required to share that information with a licensed clinician.</p> <p>Participation in research may cause a loss of privacy. We will do everything we can to keep others from learning about your participation in the research. To help us protect your privacy, we have obtained a Certificate of Confidentiality from the National Institutes of Health. The researchers can use this Certificate to legally refuse to disclose information that may identify you in any federal, state, or local civil, criminal, administrative, legislative, or other proceedings, for example, if there is a court subpoena. The researchers will use the Certificate to resist any demands for information that would identify you, except as explained below. The Certificate cannot be used to resist a demand for information from personnel of the United States federal or state government agency sponsoring the project and that will be used for auditing or program evaluation of agency funded projects. You should understand that a Certificate of Confidentiality does not prevent you or a member of your family from voluntarily releasing information about yourself or your involvement in this research. If an insurer, medical care provider, or other person obtains your written consent to receive research information, then the researchers will not use the Certificate to withhold that information. The Certificate of Confidentiality will not be used to prevent disclosure to state or local authorities of such as child abuse and neglect, or harm to self or others.</p> <p>Brown University staff sometimes review studies like this one to make sure they are being done safely and correctly. If a review of this study takes place, your records may be examined. The reviewers will protect your confidentiality.</p> <p>8. What if I want to stop? You do not have to be in this study if you do not want to be. Even if you decide to be in this study, you can change your mind and stop at any time.</p> <p>If you refuse to participate in or leave the study, your current or future relationship with Brown University will not be affected.</p> <p>9. Who can I talk to if I have questions about this study? If you have any questions about your participation in this study, you can call Dr. Micalizzi at 401-863-6640 or email her at lauren_micalizzi@brown.edu.</p> <p>10. Who can I talk to if I have questions about my rights as a participant? If you have questions about your rights as a research participant, you can contact Brown University's Human Research Protection Program at 401-863-3050 or email them at IRB@Brown.edu.</p>

561	[pcconsentv6]	<p>BROWN UNIVERSITY CONSENT FOR RESEARCH PARTICIPATION</p> <p>Parent Consent Study Title: Prenatal Pathways to Adolescent Health and Behavior (Version 6, March 1, 2022) IRB Protocol # 1912002589</p> <p>KEY INFORMATION: You are invited to take part in a Brown University research study. Your participation is voluntary.</p> <ul style="list-style-type: none"> • PURPOSE: This project is a follow-up of the Baby's Breath study that you completed when you were pregnant with the child who is also being asked to participate in this study. We want to learn more about your health and behavior since the completion of the original study. Just because you participated in the original study, that does not mean that you have to be part of this study. • PROCEDURES: You will be asked to attend three visits to Brown University (today, and approximately 6 and 12 months from today) and will complete: (1) computer games; and (2) questionnaires about yourself and your child. We will ask about your stress, what it is like living in your home now and when your child was younger, your substance use and problems that you may have, and how quickly and accurately you think about information. You will be asked to play computer games and you will be wearing a heart monitor and respiration belt as you play. • TIME INVOLVED: The study will take approximately 2 hours on your first visit and 1.5 hours of your time on 2 future visits to Brown University. In total, this study will take 5 hours of your time. • COMPENSATION: You will receive \$50 for the first visit. You will receive \$25 for each follow-up visit. In total, you can receive up to \$100. You will be paid in gift cards after each visit. We will email you the gift card. If you keep your scheduled appointments, you will also be entered to win a raffle to win an additional \$100 gift card. Raffles will be drawn twice per year. You will be entered to win 1 gift card every 6 months during your participation in the study. Your odds of winning are about 1 in 15 per raffle. <p>Compensation for travel expenses (e.g., parking costs, bus or cab fares) will also be provided.</p> <ul style="list-style-type: none"> • RISKS: You may feel uncomfortable about the sensitive topics discussed, and you may experience boredom while completing computer games. There is a chance of loss of privacy and confidentiality. We take these risks seriously and explain the risks and how they are minimized in sections 4 and 5 below. • BENEFITS: There are no direct benefits to participants in this study. <p>1. Researcher(s): This research is being conducted by Lauren Micalizzi, Ph.D. She may be contacted at lauren_micalizzi@brown.edu.</p> <p>2. What is this study about? The purpose of the study to learn more about your health and behavior since the completion of the original study. We want to learn about what it is like living in your home now and when your child was younger, your substance use and other problems that you may have, and how quickly and accurately you think about information. You are being asked to participate in this study because: (1)</p>	descriptive

you and your child participated in the Baby's Breath study when you were pregnant with your child; (2) your child is now approximately 13-17 years of age; (3) you speak and understand English. Your participation in this study starts today and will end when you complete your third visit to Brown University approximately 12 months from today.

3. What will I be asked to do?

Today you will be asked to complete computer games and questionnaires about how quickly and accurately you think about information, your behavior, your health, and aspects of your home and family now and when your child was younger. You may refuse to answer or skip any questions asked of you. You and your child will complete the study in separate rooms.

The study will take approximately 2 hours on your first visit and 1.5 hours of your time on 2 future visits to Brown University. In total, this study will take approximately 5 hours of your time.

4. Will I be paid?

You will receive \$50 today and \$25 when you return in 6 and 12 months. You will be paid in gift cards after each visit. If you keep your appointments, you will also be entered to win a raffle every 6 months to win one additional \$100 gift card. Your chances of winning are about 1 in 15 per raffle.

5. What are the risks?

We are going to ask you a lot of questions about your child and what it is like living in your house. Some of the questions we ask in the interview may make you uncomfortable, or bring up unpleasant feelings or memories. People answer these questions in a lot of different ways. There is no right or wrong way to answer these questions. How you answer these questions does not mean there is anything good or bad about you. The questionnaires that you will answer are commonly used in research and clinical practice. You may choose not to answer any questions and you may stop your participation in the study at any time. You may also request to speak with Dr. Spirito, a licensed clinical psychologist that is involved in this study at any time if you become upset or experience emotional discomfort. You will be asked sensitive information about a number of behaviors including alcohol and drug use and other problem behaviors.

There is a risk of loss of privacy or confidentiality of these data. We take this risk very seriously, and we will take steps to protect your and your child's information. We describe the steps we will take in Section 7 "How will my information be protected" below.

The heart monitor consists of wired electrodes that will be attached to your skin and you will be asked to wear a respiration belt. You may experience some discomfort from the heart monitor and respiration belt and it may cause skin irritation. We will do everything we can to make sure these are comfortable for you. If it is not, we can remove it.

6. What are the benefits?

You may not directly benefit from being in this research study.

7. How will my information be protected?

All of your records from this study will be treated as private records. Your name will not be on the questionnaires. All information will be identified only by a code number, not your name. All data will be stored on a

secure server or a password protected, encrypted external hard drive stored in a locked cabinet.

Only researchers working on this study will have access to the information you provide. There are times when other researchers may ask to see the responses of participants in the study. If this occurs, we will not release your name or any other information that could identify you.

There are times when the law might require Brown University to release you or your child's information without either of your permission. To give you some examples, if you disclose information that makes us suspect abuse or neglect of your children, or if your child reports any information that makes us suspect that she or he has been the victim of abuse or neglect, State Law requires that we report that information to the Department of Children, Youth and Families (DCYF). If you or your child disclose information that makes us concerned that you or your child are a harm to yourself/themselves or others, we will be required to share that information with a licensed clinician.

Participation in research may cause a loss of privacy. We will do everything we can to keep others from learning about your participation in the research. To help us protect your privacy, we have obtained a Certificate of Confidentiality from the National Institutes of Health. The researchers can use this Certificate to legally refuse to disclose information that may identify you in any federal, state, or local civil, criminal, administrative, legislative, or other proceedings, for example, if there is a court subpoena. The researchers will use the Certificate to resist any demands for information that would identify you, except as explained below. The Certificate cannot be used to resist a demand for information from personnel of the United States federal or state government agency sponsoring the project and that will be used for auditing or program evaluation of agency funded projects. You should understand that a Certificate of Confidentiality does not prevent you or a member of your family from voluntarily releasing information about yourself or your involvement in this research. If an insurer, medical care provider, or other person obtains your written consent to receive research information, then the researchers will not use the Certificate to withhold that information. The Certificate of Confidentiality will not be used to prevent disclosure to state or local authorities of such as child abuse and neglect, or harm to self or others.

Brown University staff sometimes review studies like this one to make sure they are being done safely and correctly. If a review of this study takes place, your records may be examined. The reviewers will protect your confidentiality.

8. What if I want to stop?

You do not have to be in this study if you do not want to be. Even if you decide to be in this study, you can change your mind and stop at any time.

If you refuse to participate in or leave the study, your current or future relationship with Brown University will not be affected.

9. Who can I talk to if I have questions about this study?

If you have any questions about your participation in this study, you can call Dr. Micalizzi at 401-863-6640 or email her at lauren_micalizzi@brown.edu.

10. Who can I talk to if I have questions about my rights as a participant?

If you have questions about your rights as a research

		participant, you can contact Brown University's Human Research Protection Program at 401-863-3050 or email them at IRB@Brown.edu.

569	<p>[pcconsentdnnav1]</p> <p>BROWN UNIVERSITY CONSENT ADDENDUM FOR RESEARCH PARTICIPATION</p> <p>Parent Consent</p> <p>Study Title: Prenatal Pathways to Adolescent Health and Behavior</p> <p>Version 1, June 28, 2021</p> <p>You are already enrolled in this research study. You reviewed and signed the original study consent document (Parent Consent Version 5, date: 6/28/21). You are now being invited to take part in new study procedures that require your additional consent.</p> <ul style="list-style-type: none"> ● RESEARCHER: You can reach the person conducting this study, Lauren Micalizzi, Ph.D. at 401-863-6640 or lauren_micalizzi@brown.edu. ● NEW PROCEDURES: You are being asked to give a saliva (spit) sample which can be used to study your DNA which tells us about your genes. We will rub the inside of your mouth with cotton swabs (like Q-tips) and you will be asked to spit into a tube. This will happen at all three visits because research has shown us that your genes can change over time. <p>We are asking to do this because we want to look at the age of your genes and how the other information that we ask you about in this study (for example, your health, substance use, home environment) relate to your genes. We may study your saliva in different ways, for example we may study all of your genes to learn about behaviors or we may study specific information based on prior research.</p> <p>We will not share the genetic results with you or your child and their genetic material will not be shared outside of Brown University. We may continue to study your genetic information in different ways, but this will not include more testing.</p> <ul style="list-style-type: none"> ● TIME INVOLVED: This will take about 5 minutes of your time at this appointment and again at the appointments 6 and 12 months from now. ● COMPENSATION: You will receive \$10 each time we collect your saliva. With the addition of this new compensation, the total compensation you will receive for the entire study is \$130. ● RISKS: If you agree to saliva collection and genetic testing, there are some additional risks, including: <ul style="list-style-type: none"> a) discomfort: you may experience some mild discomfort with swabbing their cheek and spitting into the tube; b) confidentiality/the inability to de-identify genetic material: genetic material is by nature identifiable; c) results: the results of the genetic test carry information about you; and d) when you provide genetic material, you are also providing information about genetic relatives. <p>o If you experience discomfort with the saliva collection, we can take a break or stop at any time. As with all other records obtained in this study, we will treat genetic information as private data; information will be coded with a unique number and your name will not be included on the saliva tube or genetic results. Data will be stored on a secure computer server and will not be shared.</p> <p>o Their results are protected by a federal law, called the Genetic Information Nondiscrimination Act (GINA), generally makes it illegal for health insurance companies,</p>	<p>radio, Required</p> <table border="1" style="margin-bottom: 10px;"> <tr> <td style="padding: 2px;">1</td> <td style="padding: 2px;">Yes, I would like to participate and have read the information in this document.</td> </tr> <tr> <td style="padding: 2px;">0</td> <td style="padding: 2px;">No, I do not want to participate.</td> </tr> </table> <p>Custom alignment: LV</p>	1	Yes, I would like to participate and have read the information in this document.	0	No, I do not want to participate.
1	Yes, I would like to participate and have read the information in this document.					
0	No, I do not want to participate.					

		<p>group health plans, and most employers to discriminate against you based on your genetic information. This law will protect you in the following ways:</p> <ul style="list-style-type: none"> ▪ Health insurance companies and group health plans may not request the genetic information that we get from this research. ▪ Health insurance companies and group health plans may not use genetic information that we get from this research when making decisions regarding their eligibility or premiums. ▪ Employers with 15 or more employees may not use the genetic information that we get from this research when making a decision to hire, promote, or fire your child or when setting the terms of their employment. <p>Be aware that this federal law does not protect against genetic discrimination by companies that sell life insurance, disability insurance, or long-term care insurance, nor does it protect against genetic discrimination by all employers.</p> <ul style="list-style-type: none"> ● BENEFITS: You may not directly benefit from completing this part of the study. ● CONFIDENTIALITY: We will continue to follow the same measures to protect you as were described in the document you signed for the original study. <p>We will treat genetic information as private data; information will be coded with a unique number and the name will not be included on the saliva tube or genetic results. Data will be stored on a secure computer server and will not be shared. Saliva will be stored in a secure location at the Brown University. We will destroy your saliva sample after it has been studied or in 10 years if it has not yet been studied. We may contact you to ask to store the saliva longer at that time.</p> <ul style="list-style-type: none"> ● VOLUNTARY: Taking part in these procedures is optional. You do not have to complete the activities if you do not want and you can stop at any time. Deciding not to take part will not affect your participation in the original study. ● CONTACT INFORMATION: If you have any questions about your participation in this study, you can call Dr. Micalizzi at 401-863-6640 or lauren_micalizzi@brown.edu. ● YOUR RIGHTS: If you have questions about your rights as a research participant, you can contact Brown University's Human Research Protection Program at 401-863-3050 or email them at IRB@brown.edu ● CONSENT TO PARTICIPATE: Your signature below shows that you have read and understood the information in this document, and that you agree to be a research participant for the saliva procedures.

Instrument: Parent Consent for Child Version 4 (parent_consent_for_child_version_4)	 Enabled as survey
---	--

577	[pconsentc]	<p>BROWN UNIVERSITY CONSENT FOR RESEARCH PARTICIPATION</p> <p>Parent Consent for Child Participation Study Title: Prenatal Pathways to Adolescent Health and Behavior (Version 4, November 6, 2020)</p> <p>KEY INFORMATION: Your child is being invited to take part in a Brown University research study. Your child's participation is voluntary.</p> <ul style="list-style-type: none"> • PURPOSE: This project is a follow-up of the Baby's Breath study that you (or the child's birth mother) completed when you (or their birth mother) were pregnant with the child who is being asked to participate in this study. Your child is being asked to be in this study because we want to learn about how their experiences growing up made them who they are today. Just because you (or the child's birth mother) participated in the original Baby's Breath study, that does not mean that your child has to be part of this study. • PROCEDURES: Your child will be asked to attend three visits to Brown University (today, and approximately 6 and 12 months from today) and your child will complete: (1) computer games; and (2) questionnaires about themselves. We will ask about your child's stress, pubertal status, what it is like living in their home, eating habits, their friends and how they act, their substance use and other problems that they may have, and how quickly and accurately they think about information. Your child's height, weight, and waist circumference will be measured. Your child will be asked to play computer games and they will be wearing a heart monitor and respiration belt as they play. • TIME INVOLVED: The study will take 2 hours of your child's time on 3 visits to Brown University. In total, this study will take 6 hours of your child's time. • COMPENSATION: Your child will receive \$50 for the first visit. Your child will receive \$50 for each follow-up visit. In total, your child can receive up to \$150. Your child will be paid in gift cards after each visit. Your child will be paid in gift cards after each appointment in person or by email. If your child doesn't have an email, the gift card can be emailed to you. • RISKS: Your child may feel uncomfortable about the sensitive topics discussed (including their life at home, puberty, stress, and substance use), and they may experience boredom while completing computer games. There is a chance of loss of privacy and confidentiality and they may feel uncomfortable wearing the heart monitor, which we can remove if needed. We take these risks seriously and explain the risks and how they are minimized in sections 4 and 5 below. • BENEFITS: There are no direct benefits to your child for participating in this study. <p>1. Researcher(s): This research is being conducted by Lauren Micalizzi, Ph.D. She may be contacted at lauren_micalizzi@brown.edu.</p> <p>2. What is this study about? The purpose of the study is to understand how your child's experiences growing up impacted their health, thoughts, and behavior today. Your child is being asked to participate in this study because: (1) their birth mother</p>	descriptive

participated in the original Baby's Breath study; (2) they are now approximately 10-13 years of age; (3) they speak and understand English. Your child's participation in this study starts today and will end when they complete the third visit to Brown University approximately 12 months from today.

3. What will my child be asked to do?

Today your child will be asked to complete computer games and questionnaires on stress, pubertal status, what it is like living in their home, their friends and how they act, their substance use and other problems that they may have, and how they think about information. Your child may refuse to answer or skip any questions asked of them and they can discontinue participation at any time without penalty.

Your child's participation in this study may last up to 2 hours on three separate visits, totaling approximately 6 hours

4. Will I be paid?

Your child will each receive \$50 for the first visit. Your child will receive \$50 for each follow-up visit. In total, your child can receive up to \$150. Your child will be paid in gift cards after each visit.

5. What are the risks?

We are going to ask you a lot of questions about your child and what it is like to live in their house. Some of the questions we ask in the interview may make your child uncomfortable, or bring up unpleasant feelings or memories. People answer these questions in a lot of different ways. There is no right or wrong way to answer these questions. How your child answers these questions does not mean there is anything good or bad about them. The questionnaires that your child will answer are commonly used in research and clinical practice. Your child may choose not to answer any questions and your child may stop your participation in the study at any time. Your child may also request to speak with Dr. Spirito, a licensed clinical psychologist that is involved in this study at any time if they become upset or experience emotional discomfort.

Your child will be asked sensitive information about a number of behaviors including alcohol and drug use and other problem behaviors. There is a risk of loss of privacy or confidentiality of these data. We take this risk very seriously, and we will take steps to protect your and your child's information. We describe the steps we will take in Section 7 "How will my information be protected" below.

The heart monitor consists of one wired electrode that will be attached to your child's skin and your child will be asked to wear a respiration belt. Your child may experience some discomfort from the heart monitor and respiration belt and it may cause skin irritation. We will do everything we can to make sure these are comfortable for them. If it is not, we can remove it.

6. What are the benefits?

Your child may not directly benefit from being in this research study.

7. How will my information be protected?

All of your child's records from this study will be treated as private records. Your name and your child's name will not be on the questionnaires. All information will be identified only by a code number, not names. All computer data will be stored on a secure, password protected server accessible only to research staff or a password protected,

encrypted external hard drive stored in a locked cabinet.

Only researchers working on this study will have access to the information you provide. There are times when other researchers may ask to see the responses of participants in the study. If this occurs, we will not release your child's name or any other information that could identify them.

There are times when the law might require Brown University to release your child's information without either of your permission. To give you some examples, if your child reports any information that makes us suspect that she or he has been the victim of abuse or neglect, State Law requires that we report that information to the Department of Children, Youth and Families (DCYF). If your child discloses information that makes us concerned that your child is a harm to themselves or others, we will be required to share that information with a licensed clinician.

Participation in research may cause a loss of privacy. We will do everything we can to keep others from learning about your child's participation in the research. To help us protect your privacy, we have obtained a Certificate of Confidentiality from the National Institutes of Health. The researchers can use this Certificate to legally refuse to disclose information that may identify your child in any federal, state, or local civil, criminal, administrative, legislative, or other proceedings, for example, if there is a court subpoena. The researchers will use the Certificate to resist any demands for information that would identify your child, except as explained below. The Certificate cannot be used to resist a demand for information from personnel of the United States federal or state government agency sponsoring the project and that will be used for auditing or program evaluation of agency funded projects. A Certificate of Confidentiality does not prevent you or a member of your family from voluntarily releasing information about yourself or your involvement in this research. If an insurer, medical care provider, or other person obtains your written consent to receive research information, then the researchers will not use the Certificate to withhold that information. The Certificate of Confidentiality will not be used to prevent disclosure to state or local authorities of such as child abuse and neglect, or harm to self or others.

Brown University staff sometimes review studies like this one to make sure they are being done safely and correctly. If a review of this study takes place, your child's records may be examined. The reviewers will protect your confidentiality.

8. What if I want to stop?

Your child does not have to be in this study if they do not want to be or if you do not want them to be. Even if you and your child decide they will be in this study, you and your child can change your minds and stop at any time.

If your child refuses to participate in or leave the study, you and your child's current or future relationship with Brown University will not be affected.

9. Who can I talk to if I have questions about this study?

If you have any questions about your child's participation in this study, you can email Dr. Micalizzi at lauren_micalizzi@brown.edu.

10. Who can I talk to if I have questions about my rights as a participant?

If you or your child have questions about their rights as a research participant, you can contact Brown University's

		Human Research Protection Program at 401-863-3050 or email them at IRB@Brown.edu.

585	[pforcv6]	<p>BROWN UNIVERSITY CONSENT FOR RESEARCH PARTICIPATION</p> <p>Parent Consent for Child Participation Study Title: Prenatal Pathways to Adolescent Health and Behavior (Version 6, March 1, 2022) IRB Protocol # 1912002589</p> <p>KEY INFORMATION: Your child is being invited to take part in a Brown University research study. Your child's participation is voluntary.</p> <ul style="list-style-type: none"> • PURPOSE: This project is a follow-up of the Baby's Breath study that you (or the child's birth mother) completed when you (or their birth mother) were pregnant with the child who is being asked to participate in this study. Your child is being asked to be in this study because we want to learn about how their experiences growing up made them who they are today. Just because you (or the child's birth mother) participated in the original Baby's Breath study, that does not mean that your child has to be part of this study. • PROCEDURES: Your child will be asked to attend three visits to Brown University (today, and approximately 6 and 12 months from today) and your child will complete: (1) computer games; and (2) questionnaires about themselves. We will ask about your child's stress, pubertal status, what it is like living in their home, eating habits, their friends and how they act, their substance use and other problems that they may have, and how quickly and accurately they think about information. Your child's height, weight, and waist circumference will be measured. Your child will be asked to play computer games and they will be wearing a heart monitor and respiration belt as they play. • TIME INVOLVED: The study will take 2 hours of your child's time on 3 visits to Brown University. In total, this study will take 6 hours of your child's time. • COMPENSATION: Your child will receive \$50 for each visit if. In total, your child can receive up to \$150.Your child will be paid in gift cards after each appointment by email. If your child doesn't have an email, the gift card can be emailed to you. If your child keeps their appointments, they will also be entered to win a raffle to win an additional \$100 gift card. Raffles will be drawn twice per year. They will be entered to win 1 gift card every 6 months during their participation in the study. Your child's chances of winning are about 1 in 15 per raffle. • RISKS: Your child may feel uncomfortable about the sensitive topics discussed (including their life at home, puberty, stress, and substance use), and they may experience boredom while completing computer games. There is a chance of loss of privacy and confidentiality and they may feel uncomfortable wearing the heart monitor, which we can remove if needed. We take these risks seriously and explain the risks and how they are minimized in sections 4 and 5 below. • BENEFITS: There are no direct benefits to your child for participating in this study. <p>1. Researcher(s): This research is being conducted by Lauren Micalizzi, Ph.D. She may be contacted at lauren_micalizzi@brown.edu.</p> <p>2. What is this study about?</p>	descriptive

The purpose of the study is to understand how your child's experiences growing up impacted their health, thoughts, and behavior today. Your child is being asked to participate in this study because: (1) their birth mother participated in the original Baby's Breath study; (2) they are now approximately 13-17 years of age; (3) they speak and understand English. Your child's participation in this study starts today and will end when they complete the third visit to Brown University approximately 12 months from today.

3. What will my child be asked to do?

Today your child will be asked to complete computer games and questionnaires on stress, pubertal status, what it is like living in their home, their friends and how they act, their substance use and other problems that they may have, and how they think about information. Your child may refuse to answer or skip any questions asked of them and they can discontinue participation at any time without penalty.

Your child's participation in this study may last up to 2 hours on three separate visits, totaling approximately 6 hours.

4. Will I be paid?

Your child will receive \$50 for each visit. In total, your child can receive up to \$150. Your child will be paid in gift cards after each appointment by email. If your child doesn't have an email, the gift card can be emailed to you. If your child keeps their appointments, they will also be entered to win a raffle to win an additional \$100 gift card. Raffles will be drawn twice per year. They will be entered to win 1 gift card every 6 months. Your child's chances of winning are about 1 in 15 per raffle.

5. What are the risks?

We are going to ask you a lot of questions about your child and what it is like to live in their house. Some of the questions we ask in the interview may make your child uncomfortable, or bring up unpleasant feelings or memories. People answer these questions in a lot of different ways. There is no right or wrong way to answer these questions. How your child answers these questions does not mean there is anything good or bad about them. The questionnaires that your child will answer are commonly used in research and clinical practice. Your child may choose not to answer any questions and your child may stop your participation in the study at any time. Your child may also request to speak with Dr. Spirito, a licensed clinical psychologist that is involved in this study at any time if they become upset or experience emotional discomfort.

Your child will be asked sensitive information about a number of behaviors including alcohol and drug use and other problem behaviors. There is a risk of loss of privacy or confidentiality of these data. We take this risk very seriously, and we will take steps to protect your and your child's information. We describe the steps we will take in Section 7 "How will my information be protected" below.

The heart monitor consists of wired electrodes that will be attached to your child's skin and your child will be asked to wear a respiration belt. Your child may experience some discomfort from the heart monitor and respiration belt and it may cause skin irritation. We will do everything we can to make sure these are comfortable for them. If it is not, we can remove it.

6. What are the benefits?

Your child may not directly benefit from being in this

research study.

7. How will my information be protected?

All of your child's records from this study will be treated as private records. Your name and your child's name will not be on the questionnaires. All information will be identified only by a code number, not names. All computer data will be stored on a secure, password protected server accessible only to research staff or a password protected, encrypted external hard drive stored in a locked cabinet.

Only researchers working on this study will have access to the information your child provides. There are times when other researchers may ask to see the responses of participants in the study. If this occurs, we will not release your child's name or any other information that could identify them.

There are times when the law might require Brown University to release your child's information without either of your permission. To give you some examples, if your child reports any information that makes us suspect that she or he has been the victim of abuse or neglect, State Law requires that we report that information to the Department of Children, Youth and Families (DCYF). If your child discloses information that makes us concerned that your child is a harm to themselves or others, we will be required to share that information with a licensed clinician.

Participation in research may cause a loss of privacy. We will do everything we can to keep others from learning about your child's participation in the research. To help us protect your privacy, we have obtained a Certificate of Confidentiality from the National Institutes of Health. The researchers can use this Certificate to legally refuse to disclose information that may identify your child in any federal, state, or local civil, criminal, administrative, legislative, or other proceedings, for example, if there is a court subpoena. The researchers will use the Certificate to resist any demands for information that would identify your child, except as explained below. The Certificate cannot be used to resist a demand for information from personnel of the United States federal or state government agency sponsoring the project and that will be used for auditing or program evaluation of agency funded projects. A Certificate of Confidentiality does not prevent you or a member of your family from voluntarily releasing information about yourself or your involvement in this research. If an insurer, medical care provider, or other person obtains your written consent to receive research information, then the researchers will not use the Certificate to withhold that information. The Certificate of Confidentiality will not be used to prevent disclosure to state or local authorities of such as child abuse and neglect, or harm to self or others.

Brown University staff sometimes review studies like this one to make sure they are being done safely and correctly. If a review of this study takes place, your child's records may be examined. The reviewers will protect your confidentiality.

8. What if I want to stop?

Your child does not have to be in this study if they do not want to be or if you do not want them to be. Even if you and your child decide they will be in this study, you and your child can change your minds and stop at any time.

If your child refuses to participate in or leave the study, you and your child's current or future relationship with Brown University will not be affected.

		<p>9. Who can I talk to if I have questions about this study? If you have any questions about your child's participation in this study, you can email Dr. Micalizzi at lauren_micalizzi@brown.edu.</p> <p>10. Who can I talk to if I have questions about my rights as a participant? If you or your child have questions about their rights as a research participant, you can contact Brown University's Human Research Protection Program at 401-863-3050 or email them at IRB@Brown.edu</p>

Instrument: Parent Consent Child DNA Version 1 (parent_consent_child_dna_version_1)

 Enabled as survey

593	<p>[pforcdnav1]</p> <p>BROWN UNIVERSITY CONSENT ADDENDUM FOR RESEARCH PARTICIPATION</p> <p>Parent Consent for Child Study Title: Prenatal Pathways to Adolescent Health and Behavior Version 1, June 28, 2021</p> <p>Your child is already enrolled in this research study. You reviewed and signed the original study consent document (Parent Consent for Child Version 5 date: 6/28/21). Your child is now being invited to take part in new study procedures that require your additional consent.</p> <ul style="list-style-type: none"> ● RESEARCHER: You can reach the person conducting this study, Lauren Micalizzi, Ph.D. at 401-863-6640 or lauren_micalizzi@brown.edu. ● NEW PROCEDURES: Your child is being asked to give a saliva (spit) sample which can be used to study their DNA which tells us about their genes. We will rub the inside of your child's mouth with cotton swabs (like Q-tips) and they will be asked to spit into a tube. This will happen at all three visits because research has shown us that your genes can change over time. <p>We are asking to do this because we want to look at the age of your child's genes and how the other information that we ask you and your child about in this study (for example, their health, substance use, home environment) relate to your child's genes. We may study their saliva in different ways, for example we may study all of their genes to learn about specific behaviors or we may study specific information based on prior research.</p> <p>We will not share the genetic results with you or your child and their genetic material will not be shared outside of Brown University. We may continue to study your child's genetic information in different ways, but this will not include more testing.</p> <ul style="list-style-type: none"> ● TIME INVOLVED: This will take about 5 minutes this appointment and again at the appointments 6 and 12 months from now. ● COMPENSATION: Your child will receive \$10 each time we collect saliva. With the addition of this new compensation, the total compensation your child will receive for the entire study is \$180. ● RISKS: If you agree to saliva collection and genetic testing for your child, there are some additional risks, including: <ul style="list-style-type: none"> a) discomfort: your child may experience some mild discomfort with swabbing their cheek and spitting into the tube; b) confidentiality/the inability to de-identify genetic material: genetic material is by nature identifiable; c) results: the results of the genetic test carry information about your child; and d) when your child provides genetic material, they are also providing information about their genetic relatives. o If your child experiences discomfort with the saliva collection, we can take a break or stop at any time. As with all other records obtained in this study, we will treat genetic information as private data; information will be coded with a unique number and your name will not be included on the saliva tube or genetic results. Data will be stored on a secure computer server and will not be shared. 	<p>radio, Required</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 10%;">1</td> <td>Yes, I would like my child to participate and have read the information in this document.</td> </tr> <tr> <td>0</td> <td>No, I do not want my child to participate.</td> </tr> </table> <p>Custom alignment: LV</p>	1	Yes, I would like my child to participate and have read the information in this document.	0	No, I do not want my child to participate.
1	Yes, I would like my child to participate and have read the information in this document.					
0	No, I do not want my child to participate.					

		<p>o Their results are protected by a federal law, called the Genetic Information Nondiscrimination Act (GINA), generally makes it illegal for health insurance companies, group health plans, and most employers to discriminate against you based on your genetic information. This law will protect your child in the following ways:</p> <ul style="list-style-type: none"> ▪ Health insurance companies and group health plans may not request their genetic information that we get from this research. ▪ Health insurance companies and group health plans may not use their genetic information that we get from this research when making decisions regarding their eligibility or premiums. ▪ Employers with 15 or more employees may not use the genetic information that we get from this research when making a decision to hire, promote, or fire your child or when setting the terms of their employment. <p>Be aware that this federal law does not protect against genetic discrimination by companies that sell life insurance, disability insurance, or long-term care insurance, nor does it protect against genetic discrimination by all employers.</p> <ul style="list-style-type: none"> ● BENEFITS: Your child may not directly benefit from completing this part of the study. ● CONFIDENTIALITY: We will continue to follow the same measures to protect your child as were described in the document you signed for the original study. <p>We will treat genetic information as private data; information will be coded with a unique number and the name will not be included on the saliva tube or genetic results. Data will be stored on a secure computer server and will not be shared. Saliva will be stored in a secure location at the Brown University. We will destroy your saliva sample after it has been studied or in 10 years if it has not yet been studied. We may contact you to ask to store the saliva longer at that time.</p> <ul style="list-style-type: none"> ● VOLUNTARY: Taking part in these procedures is optional. Your child does not have to complete the activities if they do not want to or if you do not want them to and we can stop at any time. Deciding not to take part will not affect their participation in the original study. ● CONTACT INFORMATION: If you have any questions about your participation in this study, you can call Dr. Micalizzi at 401-863-6640 or lauren_micalizzi@brown.edu. ● YOUR RIGHTS: If you have questions about your child's rights as a research participant, you can contact Brown University's Human Research Protection Program at 401-863-3050 or email them at IRB@brown.edu ● CONSENT TO PARTICIPATE: Your signature below shows that you have read and understood the information in this document, and that you agree to be a research participant for the saliva procedures.

595	<p>[pforcdnav2]</p> <p>BROWN UNIVERSITY CONSENT ADDENDUM FOR RESEARCH PARTICIPATION</p> <p>Parent Consent for Child Study Title: Prenatal Pathways to Adolescent Health and Behavior Version 2, March 1, 2022 IRB Protocol # 1912002589</p> <p>Your child is already enrolled in this research study. You reviewed and signed the original study consent document (Parent Consent for Child Version 5 date: 6/28/21). Your child is now being invited to take part in new study procedures that require your additional consent.</p> <ul style="list-style-type: none"> ● RESEARCHER: You can reach the person conducting this study, Lauren Micalizzi, Ph.D. at 401-863-6640 or lauren_micalizzi@brown.edu. ● NEW PROCEDURES: Your child is being asked to give a saliva (spit) sample which can be used to study their DNA which tells us about their genes. We will rub the inside of your child's mouth with cotton swabs (like Q-tips) and they will be asked to spit into a tube. This will happen at all three visits because research has shown us that your genes can change over time. <p>We are asking to do this because we want to look at the age of your child's genes and how the other information that we ask you and your child about in this study (for example, your health, substance use, home environment) relate to your child's genes. We may study their saliva in different ways, for example we may study all of their genes to learn about specific behaviors or we may study specific information based on prior research. We will not share the genetic results with you or your child and their genetic material will not be shared outside of Brown University. We may continue to study your child's genetic information in different ways, but this will not include more testing.</p> <ul style="list-style-type: none"> ● TIME INVOLVED: This will take about 5 minutes this appointment and again at the appointments 6 and 12 months from now. ● COMPENSATION: Your child will receive \$10 each time we collect saliva. With the addition of this new compensation, the total compensation your child will receive for the entire study is \$180. ● RISKS: If you agree to saliva collection and genetic testing for your child, there are some additional risks, including: <ul style="list-style-type: none"> a) discomfort: your child may experience some mild discomfort with swabbing their cheek and spitting into the tube; b) confidentiality/the inability to de-identify genetic material: genetic material is by nature identifiable; c) results: the results of the genetic test carry information about your child; and d) when your child provides genetic material, they are also providing information about their genetic relatives. o If your child experiences discomfort with the saliva collection, we can take a break or stop at any time. As with all other records obtained in this study, we will treat genetic information as private data; information will be coded with a unique number and your name will not be included on the saliva tube or genetic results. Data will be stored on a secure computer server and will not be shared. 	<p>radio, Required</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 10%;">1</td> <td>Yes, I would like my child to participate and have read the information in this document.</td> </tr> <tr> <td>0</td> <td>No, I do not want my child to participate.</td> </tr> </table> <p>Custom alignment: LV</p>	1	Yes, I would like my child to participate and have read the information in this document.	0	No, I do not want my child to participate.
1	Yes, I would like my child to participate and have read the information in this document.					
0	No, I do not want my child to participate.					

		<p>o Their results are protected by a federal law, called the Genetic Information Nondiscrimination Act (GINA), generally makes it illegal for health insurance companies, group health plans, and most employers to discriminate against you based on your genetic information. This law will protect your child in the following ways:</p> <ul style="list-style-type: none"> ▪ Health insurance companies and group health plans may not request their genetic information that we get from this research. ▪ Health insurance companies and group health plans may not use their genetic information that we get from this research when making decisions regarding their eligibility or premiums. ▪ Employers with 15 or more employees may not use the genetic information that we get from this research when making a decision to hire, promote, or fire your child or when setting the terms of their employment. <p>Be aware that this federal law does not protect against genetic discrimination by companies that sell life insurance, disability insurance, or long-term care insurance, nor does it protect against genetic discrimination by all employers.</p> <ul style="list-style-type: none"> ● BENEFITS: Your child may not directly benefit from completing this part of the study. ● CONFIDENTIALITY: We will continue to follow the same measures to protect your child as were described in the document you signed for the original study. We will treat genetic information as private data; information will be coded with a unique number and the name will not be included on the saliva tube or genetic results. Data will be stored on a secure computer server and will not be shared. Saliva will be stored in a secure location at the Brown University. We will destroy your saliva sample after it has been studied or in 10 years if it has not yet been studied. We may contact you to ask to store the saliva longer at that time. ● VOLUNTARY: Taking part in these procedures is optional. Your child does not have to complete the activities if they do not want to or if you do not want them to and we can stop at any time. Deciding not to take part will not affect their participation in the original study. ● CONTACT INFORMATION: If you have any questions about your participation in this study, you can call Dr. Micalizzi at 401-863-6640 or lauren_micalizzi@brown.edu. ● YOUR RIGHTS: If you have questions about your child's rights as a research participant, you can contact Brown University's Human Research Protection Program at 401-863-3050 or email them at IRB@brown.edu ● CONSENT TO PARTICIPATE: Your signature below shows that you have read and understood the information in this document, and that you agree to be a research participant for the saliva procedures.

Instrument: Emotion Regulation Questionnaire (emotion_regulation_questionnaire)

 Enabled as survey

	1003 [perq1]	Section Header: <i>THIS SURVEY IS ABOUT YOU.</i> We would like to ask you some questions about your emotional life, in particular, how you control (that is, regulate and manage) your emotions. The questions below involve two distinct aspects of your emotional life. One is your emotional experience, or what you feel like inside. The other is your emotional expression, or how you show your emotions in the way you talk, gesture, or behave. Although some of the following questions may seem similar to one another, they differ in important ways. For each item, please answer using the following scale: When I want to feel more positive emotion (such as joy or amusement), I change what I'm thinking about	radio (Matrix) <table border="1"><tr><td>1</td><td>1 Strongly disagree</td></tr><tr><td>2</td><td>2</td></tr><tr><td>3</td><td>3</td></tr><tr><td>4</td><td>4 Neutral</td></tr><tr><td>5</td><td>5</td></tr><tr><td>6</td><td>6</td></tr><tr><td>7</td><td>7 strongly agree</td></tr></table>	1	1 Strongly disagree	2	2	3	3	4	4 Neutral	5	5	6	6	7	7 strongly agree
